

FACILITIES

Our pupils need a stimulating environment which is conducive to creativity, and intellectual, physical and spiritual growth and which provides the facilities essential to underpin delivery of a broad curriculum.

In recent years we have:

- Extended the IT network to all areas of the site
- Provided data projectors and/or interactive whiteboards in 66% of teaching spaces
- Re-established the ceramic area in the Art Department
- Re-surfaced 4 netball courts
- Provided improved locker, changing and cloakroom facilities in the Senior Department
- Extensively cleared undergrowth from the perimeter areas of the school site, improving lines of sight and hence security, and replaced roadside fencing

In the next three years we will:

- Provide data projectors and/or interactive whiteboards in all teaching areas
- Extend network access into boarding and study areas
- Re-site the Reception class to give access to outdoor play areas
- Re-establish the dark room for use in Art
- Resurface the remaining courts and play areas
- Plan for the up-grading of music teaching areas
- Improve signage around the school site
